The screenshot shows the 'Collaborators and teams' interface for a public repository. At the top, it states 'Public repository' and 'This repository is public and visible to anyone', with a 'Manage visibility' button. Below this, a 'Direct access' section indicates that '2 entities have access to this repository' and provides a link to '2 collaborators'. The 'Manage access' section features a search bar labeled 'Find a collaborator...' and a list of two collaborators: JonathanPita and laura12316, both with 'Collaborator' roles and delete icons.

The screenshot displays the Eclipse IDE interface. The title bar reads 'eclipse-workspace - caso1/UsuarioSimple.java - Eclipse IDE'. The menu bar includes File, Edit, Source, Refactor, Navigate, Search, Project, Run, Window, and Help. The Package Explorer on the left shows a project named 'proyecto-tpoo' containing three packages: 'caso1', 'caso2', and 'caso3', all associated with 'tc03-laura'. The main editor window shows the code for 'UsuarioSimple.java'. The code includes imports for 'caso1' and 'java.util.Scanner', a class definition 'UsuarioSimple', and a 'main' method that uses a Scanner to read user input for a name and age, and then prints out the collected data.

```
1 : caso1;
2 java.util.Scanner;
3 class UsuarioSimple {
4
5 public static void main(String[] args) {
6 // TODO Auto-generated method stub
7
8 Scanner scanner = new Scanner(System.in);
9
10 System.out.println("Por favor, ingresa solo tu primer apellido :");
11 String nombre = scanner.nextLine();
12
13 System.out.println("Ahora, ingresa tu edad:");
14 int edad = scanner.nextInt();
15
16 System.out.println("\n--- Datos del Usuario ---");
17 System.out.println("Nombre: " + nombre);
18 System.out.println("Edad: " + edad);
19 System.out.println("¡Hola, " + nombre + "! El próximo año tendrás "
20
21 scanner.close();
22
23
```
